

NITFS Web Site Status

by Rachel Yellman
rachel@cdcsc.com

Current Internet Resources

- NITFS site: <http://www.nima.mil/imagery/NITFS/>
- NITFS public ftp area: <ftp://164.214.2.59/pub/NITFS/>
- NTB site: <http://www-ismc.itsi.disa.mil/ntb/ntb.html>
- ISMC/GSMC site: <http://www-ismc.itsi.disa.mil/>
- NTB e-mail reflector: ntb@nima.mil

Current Status

- The ISMC/GSMC site is still hosted on disa.mil; we are waiting for content check to be completed at nima.mil
- disa.mil is having access problems; which are making it difficult to access the ISMC/GSMC site
- NTB reflector is currently working well; problems do occur when nima.mil changes e-mail configuration
- Resources allocated to web maintenance are not enough for the size of the site

Current Plans

- Make publicly available ISMC/GSMC site at <http://www.ismc.nima.mil/> or <http://164.214.2.51/>; waiting for OK from NIMA corporate affairs
- Have all meeting information, event calendar, & documents on the NTB site. Leaving NITFS software & other related information at the NITFS site
- Add a form to get feedback & recommendation about the sites

Future Plans

- Redesign ISMC/GSMC site, including working group areas. Make current issues accessible from front pages.
- Add discussion groups to the ISMC/GSMC site.
- Redesign NITFS site. Considering different site navigation.
- Evaluate use of the ftp area; either keep it up to date or remove files from that area.
